holydev.cv | github.com/holydev001

PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of experience building responsive, production-ready web applications and product interfaces. Skilled in JavaScript, TypeScript, React, Next.js, Node.js, REST APIs, FastAPI, MongoDB, technical SEO, analytics, and performance optimization. Experienced translating Figma designs into reusable UI systems, integrating backend services, and collaborating through GitHub-based delivery workflows.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React, Next.js, TanStack Start, Tailwind CSS, HTML, Three.js, GSAP

Backend: Node.js, Express.js, FastAPI, REST APIs

Databases: MongoDB, MySQL, Supabase, SQL.js, Convex

Analytics and SEO: PostHog, Google Analytics 4, Meta Pixel, JSON-LD, technical SEO

Tools and Practices: Git, GitHub, Vercel, Cloudflare, Figma, React Native, Agile, code review, design systems

PROFESSIONAL EXPERIENCE

Frontend Developer - ClinSight (Remote)

2026

- Built and maintained responsive healthcare product interfaces using Next.js, React, TypeScript, and Tailwind CSS.
- Converted Figma designs into reusable UI components and production pages for marketing, waitlist, lead-generation, FAQ, contact, legal, and account-deletion flows.
- Integrated REST APIs and subscriber flows with FastAPI and MongoDB services, while supporting deployment configuration, CORS, and production fixes.
- Implemented technical SEO and conversion measurement across metadata, canonical URLs, Open Graph, sitemap, robots.txt, JSON-LD, PostHog, GA4, Meta Pixel, and identity/event tracking.

Stack: Next.js, React, TypeScript, Tailwind CSS, FastAPI, MongoDB, REST, Vercel, Cloudflare, Figma, PostHog, GA4

Full-Stack Developer - Nexus Haven (Remote)

2026 - Present

- Shipped an immersive, scroll-driven 3D landing experience for a VR meetings platform.
- Improved 3D performance by memoizing particle buffers, capping device pixel ratio, using a high-performance WebGL context, and gating GLB preloading.
- Engineered an async FastAPI backend for product waitlist registration and designed indexed MongoDB reads with connection pooling.

Stack: TanStack Start, Three.js, FastAPI, MongoDB, GSAP, Tailwind CSS

Frontend Developer - Emerj LLC (Remote)

2025 - 2026

- Built an admin analytics dashboard tracking user activity, usage trends, and platform performance.
- Shipped scalable frontend features using Next.js, TypeScript, and modern React patterns.
- Integrated backend APIs to support real-time and historical data visualization and drove code reviews and sprint planning.

Stack: Next.js, TypeScript, Tailwind CSS, REST APIs

Frontend Developer - Content Q (Remote)

2025

- Led frontend development of a production-ready marketing website using Next.js and React.
- Built responsive landing and content pages with a focus on performance, accessibility, and technical SEO.
- Implemented a waitlist system and reliable data synchronization with backend services.

Stack: Next.js, React, Tailwind CSS, SEO

Frontend Developer Intern - HNG Internship

2025

- Contributed to real-world software projects in an agile, cross-functional team environment.
- Implemented assigned features, fixed bugs, and collaborated through Git-based workflows and pull requests.

Stack: Git, React, React Native, Vue, Next.js

SELECTED PROJECTS

Kairo - Daily Journal and Personal Command Center | 2026

A local-first desktop daily journal and personal command center built around continuous improvement. Designed morning alignment, commitment tracking, evening reflection, and weekly course correction into a calm, structured workflow.

Source: github.com/holydev001/kairo | Windows beta available via GitHub Releases

Stack: Electron, React, TypeScript, Vite, SQL.js, Zustand, Zod

Visual Query Builder | 2025

An interactive drag-and-drop SQL query builder that makes data exploration accessible to non-SQL users while generating production-ready queries.

Live: visual-query-builder-ten.vercel.app | Source: github.com/holydev001/visual-query-builder

Stack: React, TypeScript, SQL, drag-and-drop UI

OBJEKT//404 | 2025

An experimental interactive artifact exploring brutalist web design and real-time 3D through drag, scroll, and hover-driven object manipulation.

Live: objekt-404.vercel.app | Source: github.com/holydev001/objekt-404

Stack: React, Three.js, WebGL, interaction design
